

Life Cycle of a Tomato

Instructions:

Version 1

Print two sets of pictures. Cut them out, mount on the green card and laminate. Join one set of cards in a correct order (half a tomato with seeds, seeds, seedling, young plant, blossom, green fruit, red fruit) and use as an example for pairing with second set.

Version 2

Print one set of pictures and control card. Cut them out, mount on the green card and laminate. Use the cards to demonstrate the life cycle to the child in an individual lesson. Control card helps the child to arrange the cards in a right order.
